

HOOC

HOOC mission statement

OUR ROAD TO SUCCESS

VISION

Our vision is to become a leading European provider of secure, efficient and sustainable remote management solutions; both for building automation and beyond.

MISSION

We are committed to developing software solutions and hardware components of exceptional quality, providing tailored and dependable remote access to HVAC and industrial facilities. Our array of additional services, including remote alarming, reporting, and networking, further fortify the security of remote operations. With our comprehensive and intuitive approach, we play a pivotal role in optimizing maintenance, management, energy, and staff training costs for our customers.

VALUES

As a Swiss company with a long tradition in the HVAC and building automation industry, we stand for quality and reliability. Our tailor-made solutions meet the requirements of installers, operators and maintenance providers. We maintain a culture of open communication with our employees and long-term partnerships based on trust and appreciation. Our investors focus on healthy corporate development rather than pure profit maximization. Through continuous innovation, we make a positive contribution to sustainability, the environment and society.
