Choose your device

THE HOOC-GATEWAYS

	CONNECT L	CONNECT H	CONNECT XT
--	-----------	-----------	------------

Product info	The Connect L always comes into play when remote maintenance of network infrastructure and security technology is required.	The Connect H, known as our classic top-hat rail model, facilitates remote access to all HVAC applications in building technology.	The Connect XT is recommended for simple applications with an existing Internet connection, such as those found in offices and smart homes.

CONNECT XH	CONNECT XF	CONNECT XM	CONNECT X
------------	------------	------------	-----------

The Connect XH serves as our complete solution for building and industrial automation, especially suitable for implementing separate networks.	The Connect XF is designed to enable energy-efficient transmission of sensor data as well as uncomplicated retrofitting of older systems.	The Connect XM finds its application especially in temporary commissioning, providing mobile access to PLC systems and industrial sites.	The Connect X, our all-rounder, combines all the interfaces, services and functionalities of the latest generation in one single device.
